

MICROMARMO[®] Floor

The new Eco- tactile finish of top-class Design, for an entire surface, both horizontal and vertical!!

- An innovative formula consisting of a single, one-component powder product, used both as a smoothing agent (due to its extraordinary filling power) and as a finishing.
- 100% Eco-Friendly, it is not and doesn't want to be a resin floor! MicroMarmo Floor is a mineral finish, with natural source components and marble inerts.
- An amazing feeling of comfort, which can't be achieved with "cold" and synthetic resin flooring.
- The possibility of obtaining entire, floor-wall solutions, giving a great visual impact and originality.
- Endless decorative effects, which make it possible to create splendid finishes: from the classic "Spatolato" to the vintage of Maiolica effect., Contemporary effect, Favignana and even Beton...
- Possibility to personalize the finish; from opaque to polished, or elaborated by special additions of precious metallic and/or pearlescent components. Over 150 colours available!
- Adaptable to any type of design setting: hotel rooms, lounges, bars & restaurants, spa area, shops, showrooms, offices, or apartments, including bathrooms and shower facilities.
- Total waterproofness, the entire cycle of MicroMarmo Floor due to the special Matt Protector 2K protection.
- Thickness (2-3 mm.) For strong mechanical resistance and scratch.
